

KARADENİZ TECHNICAL UNIVERSITY

TRABZON | 2024

Foundation I History

Established on May 20, 1955 and having launched education in 1963, Karadeniz Technical University provides education in the fields of Technical Sciences, Natural Sciences, Humanities and Health Sciences. In addition, it aims to educate qualified and professional individuals with Vocational Colleges, which are one of the most important educational Institutions that will meet the technical needs of our city, region, and country. Likewise, it prepares highly qualified individuals and academic staff for the future through its graduate schools in line with the needs of Turkey.

Foundation I History

Founded with the approval of the bill proposed by Trabzon Deputy Mustafa Reşit Tarakçıoğlu and his twenty-eight comrades by the law dated 20 May 1955 and numbered 6594, KTU is the first university of Türkiye established outside İstanbul and Ankara. About 8 years after its foundation, Faculties of Basic Sciences, Civil Engineering and Architecture, Mechanical and Electrical Engineering, and Forestry were established through the assignment of staff for the rector's office and faculties under the law no. 336 dated 19 September 1963. The university commenced its educational activities in the building of Atatürk Primary School located in the Esentepe neighborhood in Trabzon on 2 December 1963. Later in 1966, it moved to its current campus. Continuing to its development, KTU assigned faculty staff to the faculties of Earth Sciences and Medicine with the law no. 1659 dated 4 January 1973. Following the enactment of the Law on Higher Education no. 2547 in 1981, the university accelerated its expansion by opening new faculties and departments.

History

Logo | Emblem

The first logo from the opening ceremony

Our logo meaning universe, science and human

Emblems used until 2000

Logos used between 2015-2020

Logo | Emblem

The design of the Karadeniz Technical University emblem dates back to 1968. This emblem comprises the concepts human, science and the universe that brings them together.

Ship Bridge Simulator

The Fully Equipped Ship Bridge Simulator System

The Fully Equipped Ship Bridge Simulator System, which allows students to put the theoretical knowledge they have learned into practice, visualizes 360° horizontally and changes its vertical view up and down. Adapting to different environmental, weather and sea conditions, it has the capacity to flip the image from the virtual bow direction to the bridge dovetails. It is equipped with the necessary maneuvering and rudder consoles for these situations and the equipment necessary for the cruise control of a classical and modern ship.

KTU DENAR-I Research Vessel

Designed and equipped for navigation and scientific studies to carry out close coastal voyages, the vessel was launched on 11 September 2014. It has the ability to participate in all kinds of National and International activities in the blue homeland and on the open seas thanks to its capacity and equipment.

KTU DENAR-I

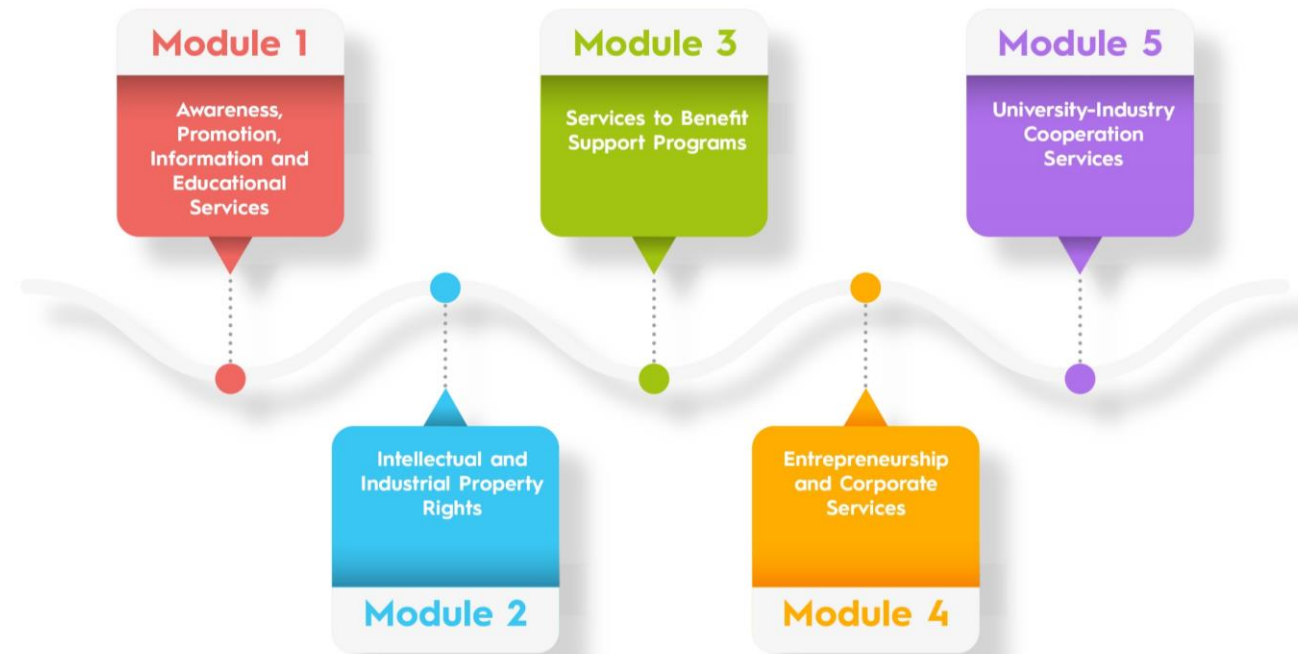

Medical Device Design and Production Application and Research Center (METAM)

METAM operates with the mission of ensuring the domestic production of the medical devices and products that our country needs, managing the revision processes, offering innovative design activities, producing R&D-focused solutions, supporting the scientific infrastructure, and increasing public-university-industry collaboration. METAM also continues its work in the context of technology transfer, conducting national and international advertising, promotion, and awareness activities within the framework of its strategic corporate development principles. In this regard, participation in the Expomed Eurasia 2023 Fair has been carried out.

Technology Transfer Application and Research Center (TTM)

TTM was established on the purposes of being a guidance to mainly Trabzon province and Eastern Karadeniz Region in contributing to the R&D oriented information and production needs in the region, developing university- industry cooperation activities in the region, ensuring the protection, marketing and commercialization of Intellectual and Industrial Property Rights, establishing and developing entrepreneurial culture, business guidance, consulting and training services.

Structural Health Monitoring Laboratory

The Structural Health Monitoring System includes the process of 24/7 monitoring and evaluating the current structural situation with sensitive sensors placed in the building.

The Structural Health Monitoring System provides the followings:

- ▶ Monitoring structural behaviors of buildings
- ▶ Determination of the structural conditions after an earthquake
- ▶ Providing the life safety protection and emergency response by activating the emergency warning systems in case of exceeding the threshold values determined for the building.
- ▶ Determining the estimated lifetime of the structures by taking into account the reactions of the monitored structures to environmental factors.

Technocity

Trabzon Technocity contributes to the increase of competitive advantage by improving the innovation culture and the ability of companies to produce technology. Besides, it engages inactivities that will accelerate the development of technology and industry-oriented projects in universities.

Lifelong Learning

Lifelong learning covers all the learning activities that individuals will perform throughout their lives to improve their knowledge, skills, and competencies in relation to their personal, social, and business life. Lifelong learning activities are carried out by the Continuing Education Center and the Distance Education Application and Research Center. A certificate of achievement or a certificate of participation is given to the participants from all ages and statuses.

- Occupational Health and Safety Training
- Course Completion Training for Freelance Consultant Engineer
- Certificate Program for Real Estate Literacy
- Certificate Program for Building Information Modeling (BIM) and Infrastructure Projects Application
- Certificate Program for Training on Processing and Protection of Personal Data
- Certificate Program for Strategies to Be a Successful Student in Distance Education?
- Coding and Robotics Training
- Certificate Program for Training of Robotic Programming Trainer
- Certificate Program for Pardus Education
- Certificate Program for Basic Information Technologies

Lifelong Learning

Nutrition

In our university, students, academic and administrative staff benefit from the dining halls affiliated to the Health, Culture and Sports Department for their nutritional needs. They are provided with a four course lunch. Menus are prepared by our food engineer in our kitchen on Kanuni Campus in a way that is adequate and balanced, taking into account the satisfaction of our students, the energy, and nutritional elements they need to take in one meal. In this process, attention is paid to hygiene rules.

Special Needs Support

Necessary measures are taken and arrangements are made for the disabled students studying at KTU to facilitate their learning life, prepare the necessary academic environment, ensure their full participation in the education processes, and to support their social life.

Besides, the Council of Higher Education puts effort to make Higher Education Institutions in Turkey accessible to all students, with the work it has done under the titles of "Accessible and Barrier-Free Education".

In this context, our University has been deemed qualified to receive for the Orange or Green Flag for the categories specified below within the scope of the 2022 Barrier-Free University Awards:

- Faculty of Medicine - Spatial Accessibility- Orange Flag
- Faculty of Dentistry- Spatial Accessibility- Orange Flag
- Faculty of Letters- Spatial Accessibility- Orange Flag
- Faculty of Letters - Educational Accessibility- Green Flag

Special Needs Support

Chess Tournament

Seminar on Inclusion

Traditional Breakfast Meeting

Student Clubs

There are student clubs established by student initiatives where they can spend their extracurricular time, gain organizational, management, teamwork, and communication skills, and healthily develop their talents and personalities.
